

WASHCO SERVICE CHECKLIST

Washing Machines:

- Inspect and clean water inlet filters
- Inspect and clean drain pump
- Drum alignment check
- Check for bearing or motor noise
- Foot brackets secure/tight
- Fill hoses visibly sound/no leaks
- Inspect and clean door seal/glass, check for signs of wear, perishing or leak
- Door locking operational
- Cycle and start buttons operational
- Inspect and adjust drive belts
- Inspect all electrical components
- Note condition of machine
- Test insulation resistance
- Test earth continuity
- Test earth loop impedance
- Inspect MCB/fuse/RCBO/RCD Replace any defective parts

Dryers:

- Drum condition and displacement check
- Check for bearing or motor noise
- Check rollers
- Inspect and load test heaters
- Inspect main drive motor
- Inspect fan motor
- Inspect front and rear seals
- Inspect and clean vent hose and vent outlet
- Door switch and lint screen access panel switches operational
- Clean lint filter Vacuum out lint from cabinet and filters
- Cycle and start buttons operational Inspect all electrical components
- Note condition of machine
- Test insulation resistance
- Test earth continuity
- Test earth loop impedance
- Inspect MCB/fuse/RCBO/RCD (if accessible)
- Replace any defective parts

We will also check machine services:

- Electrical connections
- Make-up air vent (where relevant)
- Clean accessible ducting (where relevant)

When our engineers visit a site to carry out a service, they will also check the other machines in the building to ensure that any minor issues, which could result in a subsequent callout, are dealt with in advance.
