

Our commitment to sustainability

Tree planting initiative:

For every machine we install, we plant 1 tree, offsetting 1 ton of carbon emissions.

Reduced plastic waste:

Our auto-dosing system means students won't need to dispose of their own detergent containers, reducing plastic waste.

Reduced energy consumption

Our cold wash trials show students that washing at a lower temperature can reduce energy consumption and provide great washing results.

Responsible partners

Our unique partnership with Miele, who won the German Sustainability Award 2024, means machines come from sustainable sources.

Monitored energy consumption

Our leading-edge technology monitors real-time energy usage and provides insight to optimise machine efficiency.

Reduced carbon emissions

Our smart reporting system assigns the closest engineer to fix machines, lowering their driving time and reducing carbon emissions.

Net zero goal

Our path to net zero, ESG statement, and our ISO 14001 certification demonstrate our commitment to sustainability and reaching our net zero targets.
